PURCHASE OF *STAR*

The semimonthly issues and the cumulative index issues are available postpaid on subscription and in single copy from the Superintendent of Documents, United States Government Printing Office, Washington, D.C., 20402, United States of America.

Semimonthly issues . . .

Annual subscription rate: $33.00, domestic; $42.00, foreign. Price per single copy: $2.25, domestic; 25¢ extra for foreign mailing.

Cumulative index issues . . .

Annual subscription rate: $30.00, domestic; $35.00, foreign. Price per single copy varies according to the number of pages.

Domestic subscription rates . . .

Apply to the United States, Canada, Mexico, and all Central and South American countries, except as noted below.

Foreign subscription rates . . .

Apply to Argentina, Brazil, French Guiana, Guyana, Surinam, British Honduras, and all other countries throughout the world.

Payment should be by check, money order, or document coupons, and must accompany order. Remittances from foreign countries should be made by international money order, or draft on an American bank, payable to the Superintendent of Documents, or by UNESCO book coupons.

SPECIAL NOTICE

The abstract sections of the semi-monthly *STAR* journals can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each index entry, e.g. 21 p 4190. To assist the user in binding *STAR* Volume 5, four (4) title pages are included in the back of Section I of the Annual Indexes.

Introduction

WHAT *STAR* ANNUAL INDEXES ARE

These Annual Indexes are edited consolidations of the indexes to the individual issues of *Scientific and Technical Aerospace Reports (STAR)* for the calendar year 1967 (Volume 5, Numbers 1 through 24). For the convenience of the user, they are divided into four sections, each bound separately. Sections I and II contain the Subject Index. Section III contains the Personal Author Index. Section IV contains a Corporate Source Index, a Contract Number Index, a Report/Accession Number Index, and an Accession Number/Report Index. The Annual Indexes supersede the semimonthly and quarterly indexes previously issued during 1967.

Each entry in these indexes includes a group of identifying numbers in the following form: 06 p 0850 N67-23456. The first two digits (06) identify the issue in which the document was announced. The "p" stands for page number, and the four digits that follow (0850) refer to the page number, in the designated issue, on which the abstract of the document appears. The next group of numbers (N67-23456) is the NASA Accession Number, a unique identification number assigned by NASA to each document that was acquired, indexed, and announced in *STAR* during the year.

In addition to these identifying numbers, each entry in the Subject Index contains a Notation of Content, a one-sentence description of the contents of the document; each entry in the Personal Author and Corporate Source Indexes contains the exact title of the document.

At the beginning of each index in this cumulation, a typical listing is illustrated with each of its elements identified to assist the reader in using the different types of index entries.

HOW TO USE THE SUBJECT INDEX

Subject terms in this cumulative index are arranged alphabetically, and are supplemented with cross-references which are intended to serve as directions that will enable the user to modify, enlarge, or narrow his search in accordance with his specific interests. Two types of cross-references are used:

1. "See" ("S") is used to relate broad concepts, too general to be useful index terms, to the specific terms used in the Index. For example:

   ATTENUATION
   S ACOUSTIC ATTENUATION
   S MICROWAVE ATTENUATION
   S RADAR ATTENUATION

   "S" is also used to indicate which of a pair of synonyms has been used in this index. For example:

   COLUMBIUM
   S NIOBIUM

2. "See also" ("SA") directs a searcher from a general to a specific term for postings under the specific term that are not repeated under the general headings. For example:

HEAT
SA SOLAR HEAT
SA SPECIFIC HEAT

tells a searcher that postings under SPECIFIC HEAT are different from those under HEAT.

"SA" is also used to relate associated concepts usually having different groups of postings. For example:

PLASMA PHYSICS
SA MAGNETOHYDRODYNAMICS
SA NUCLEAR PHYSICS

tells a searcher that, while these terms are related in subject matter, postings under each term may be different.

Finally, a searcher should use the notations of content in the Index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

CATHODE
Cesium plasma cathodes as sources of high intensity electron beams.
Cathode material testing in electrochemical half cells.

illustrates a case where two references on different topics are listed under the same subject term.

AVAILABILITY OF *STAR* AND DOCUMENTS

NASA documents (identified by an asterisk in the abstract section and in the report/accession number and accession/report numbers indexes) and *STAR* are available without change to:

1. NASA Offices, Centers, contractors, subcontractors, grantees, and consultants.
2. Other U.S. Government agencies and their contractors.
3. Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public use.
4. Other organizations in the United States having a need for NASA documents in work related to the aerospace program.
5. Foreign government or academic (university) organizations that have established reciprocal arrangements for the exchange of publications with NASA, that have current agreements for scientific and technical cooperative activities with NASA, or that have arrangements with NASA to maintain collections of NASA documents for public use.

European requesters may purchase facsimile copy or microfiche of NASA documents, identified by a pound sign (#), from ESRO/ELDO Space Documentation Service, European Space Research Organization, 114, av. de Neuilly, 92 – NEUILLY sur Seine, France. Advisory Group for Aerospace Research & Development (AGARD) reports that are not copyrighted will be made available on the same basis as NASA documents.

HOW TO REQUEST LISTED DOCUMENTS

If you are registered with NASA, send a completed *Document Request* (Facility Form 492) to:

NASA Scientific and Technical Information Facility
P.O. Box 33
College Park, Maryland 20740

If you are not registered with NASA, but are eligible to receive documents without charge according to the information on the previous page in the section on Availability of *STAR* and Documents, request Registration Form—Technical Publications (Facility Form 713) from the above address.

HOW THE PUBLIC MAY OBTAIN LISTED DOCUMENTS

For reference purposes, NASA documents listed in *STAR* may be consulted at one of the organizations listed on the inside back cover. Commerical publications listed in *STAR* may be consulted in libraries or purchased from publishers or booksellers.

The public may purchase NASA documents and non-copyrighted foreign documents, including AGARD reports, from either of the following sales agencies as specifically identified in the abstract section:

Clearinghouse for Federal Scientific and Technical Information
(CFSTI)
Springfield, Virginia 22151

Superintendent of Documents, U.S. Government Printing Office
(GPO)
Washington, D.C. 20402

Documents available from CFSTI are sold in hart copy and microfiche form. If a printed hard copy is not available, a facsimile copy is provided. The symbols "HC" and "MF" are used in the abstract section to designate the copy available. "HC" (hard copy) for full size or facsimile; "MF" for microfiche. A unit price policy has been established by CFSTI: $3.00 for printed hard copy or facsimile copy; $0.65 for microfiche.

Not all NASA documents, however, are subject to this policy. Documents available from Superintendent of Documents which are also available from CFSTI are sold at the Superintendent of Documents price, and other selected NASA publications will continue to be priced according to previous practices. In all cases, the *STAR* citation includes the specific sale price which applies.

Following the availability information in the citation of each NASA-supported document is a code, e.g., CSCL 25A, indicating the subject category assigned to that document from the *COSATI Subject Category List* (first ed., December, 1964) published by the Committee on Scientific and Technical Information of the Federal Council for Science and Technology.

The public may request non-NASA documents by writing to the source or other information systems. Bibliographic information, e.g., report number, etc., rather than the NASA accession number (i.e., N68-12345) should always be provided when requesting such a document from its source.

Department of Defense documents (identified by the "AD" number in the citation) are available without charge to U.S. Government-sponsored research and development activities from the Defense Documentation Center (DDC), Cameron Station, Alexandria, Virginia 22314. Department of Defense documents are not available from NASA.

Other non-NASA documents are provided by NASA without charge only to NASA Offices, Centers, contractors, subcontractors, grantees, and consultants. Foreign non-copyrighted documents will be provided to U.S. Government Agencies and their contractors.

Documents that have been placed on microfiche (a transparent sheet of film, approximately 4×6" in size, capable of containing an orderly arrangement of 60 or more pages of information reduced to micro images) are identified with the symbol #. Microfiche are available on the same basis as hard copy.

ABSTRACTS OF JOURNAL ARTICLES

By arrangement between NASA and the American Institute of Aeronautics and Astronautics, the AIAA publication *International Aerospace Abstracts* is issued in coordination with *STAR*. Each journal appears on alternate weeks. *IAA* uses subject categories identical with those in *STAR*, and publishes similar indexes. *IAA's* worldwide coverage of books and scientific and trade journals complements *STAR's* worldwide report coverage. The two publications thus provide comprehensive access to current literature on aerospace science and technology.

Organizations having a NASA contract may obtain *IAA* by writing NASA, Code USS-A Washington, D.C. 20546. Others should direct inquiries to the American Institute of Aeronautics and Astronautics, 750 Third Avenue, New York, N. Y. 10017.

Annual subscription rates for *IAA*:

Semimonthly issues: United States and Possessions, $33.00 postpaid;
Foreign countries, $42.00 postpaid.
Cumulated Index Volumes: United States and Possessions, $30.00 postpaid;
Foreign countries, $35.00 postpaid.

PAYLOAD
SA INSTRUMENT PACKAGE
Payload capabilities of Saturn IB-Centaur for launch opportunities to Mars in 1971, 1973, and 1975 and to Venus in 1972 and 1973
[NASA-TM-X-1327] 03 p0465 N67-13177
ELDO launch vehicle configurations, upper stage payload, and performance estimates
[DTA/S-12/5-616] 04 p0616 N67-14270
Technical feasibility of increasing payload of ELDO-A launch vehicle to capabilities of launching communications satellite in polar orbit
[BOLKOW-RF-12E] 04 p0607 N67-14311
Helicopter design for range, endurance, payload, and hovering mission requirements 05 p0633 N67-15189
High speed and payload capability of rotary wing aircraft 05 p0633 N67-15193
Scientific objectives and payload definition for automated biological laboratory for exploration of life on Mars
[NASA-CR-81310] 06 p0969 N67-16576
Booster and upper stage system capabilities of placing payloads into Mars orbit
[NASA-TM-X-1334] 08 p1361 N67-18359
Design and fabrication of instrumented payload test vehicle and three types of radio frequency transparent, omnidirectional, impact absorbing, landing systems
[NASA-CR-66301] 10 p1765 N67-21178
Payload and trajectory data for Nike Apache firings tracked by radar - January-June 1965
[NASA-TM-X-55723] 10 p1762 N67-21396
Payload and trajectory data for Nike Apache firings tracked by radar - July-December 1965
[NASA-TM-X-55726] 10 p1762 N67-21399
Sodium and trimethylaluminum payloads for test rocket flight - camera equipment for night and twilight photography
[GCA-TR-66-8-A] 11 p1981 N67-22396
Payload preparation and launching of Black Brant III rocket
[SRFB-001] 11 p1982 N67-22944
Experimental payloads for manned Mars flyby mission, including onboard remote sensors and unmanned probes for measuring Martian environment
[NASA-CR-85122] 16 p2970 N67-29691
Performance and payload gains by launching rockets from ejection tube
[NASA-TM-X-52338] 16 p2976 N67-30142
Payload preparation and launching of Black Brant rockets AAF-III-12 and AAF-IV-05
[SRFB-004] 17 p3165 N67-30378
ESRO sounding-rocket payload experiments - total stellar flux measurement and primary cosmic radiation measurement
[ESRO-SN-63] 17 p3168 N67-31405
Payload missions and design of third Rubis rocket launched in April 1966, and data on geomagnetic and electric field structure
[MPI-PAE-EXTRATERR.-35/66] 19 p3542 N67-33942
Comet-intercept space probe mission constraints, and suggested scientific payload for cosmogonical research 20 p3727 N67-34781
Latch diaphragm release mechanism for payload separation in space 21 p3927 N67-36205
High speed and payload capabilities of various rotary wing aircraft designs 23 p4178 N67-38542
Stratoscope II telescope shock sensitivity, payload, and launching site problems 23 p4256 N67-39276
Balloon shapes and stresses under off-design conditions of payload and altitude 23 p4179 N67-39279
Management planning guidelines for standard payload module definition network
[NASA-TM-X-53299] 24 p4426 N67-40151
Payload preparation and launching of Black Brant rocket AAF-VA-107
[SRFB-006] 24 p4538 N67-40387

PAYLOAD MASS RATIO
Electric propulsion and payload mass ratio for moon-earth payload transport 10 p1754 N67-20510
Performance characteristics of 17 sounding rockets according to payload mass ratio

PEARSON DISTRIBUTION
Feasibility of determining robustness regions of T-test in Pearson system by Monte Carlo technique
[RR-23] 01 p0008 N67-10305
Likelihood ratio test criterion for small samples from multinomial distributions
[ORNL-3991] 07 p1113 N67-17471
Estimation of location parameters of Pearson type III and Weibull distributions in nonregular case and other results in nonregular estimation
[ARL-66-0233] 17 p3089 N67-30217

PEBBLE BED REACTOR EXPERIMENT /PBRE/
Creep behavior calculations and experiments for fuel sphere circulation in pebble bed reactor
[EUR-3284.D] 14 p2576 N67-27137
Ring addition and side chain substitution for chlorination of toluene to produce benzotrichloride
[NYO-3718-1] 19 p3388 N67-32910
Reactivity worth of tubular control rods in beryllium oxide moderated pebble bed reactor system
[AAEC/TM375] 20 p3677 N67-34011
Burnup code for treating space dependent pebble bed reactor fuel management
[AAEC/E173] 20 p3682 N67-34579
Pebble bed reactor compared to gas turbine coupled reactor to achieve optimum gas cooled reactor design for nuclear power plant
[THTR-32] 23 p4293 N67-39344

PEGASUS SATELLITE
Satellite instrumentation and data retrieval procedures for collecting meteoroid penetration data from Pegasus satellite
[NASA-TN-D-3505] 02 p0311 N67-11381
Structural design and data acquisition systems of Pegasus satellite 02 p0312 N67-11382
Thermal environment factors affecting electronic canister design for Pegasus satellite 02 p0312 N67-11383
Meteoroid detector development, and hypervelocity impact and electron radiation test data 02 p0312 N67-11384
Satellite control station methods and facilities for evaluating Pegasus in-flight performance, and meteoroid penetration data 02 p0312 N67-11385
Data collection and analysis of meteoroid penetration recorded on Pegasus flights, and derived flux figures 02 p0312 N67-11386
Pegasus measurements of temperature, radiation, and rigid body motion 02 p0312 N67-11387
Thermal design evaluation of meteoroid detector panels, louver system, and service module adaptor for Pegasus satellite
[NASA-TN-D-3642] 02 p0313 N67-11906
Statistical analysis of Pegasus satellite measurements of meteoroid penetration
[NASA-TM-X-1316] 03 p0388 N67-12908
Thermophysics, emissivity physics, thermal similitude, ultraviolet interactions with control surface materials, Pegasus satellite measurements, and infrared instrumentation
[NASA-TM-X-53557] 12 p2103 N67-24641
Environmental effect sensor data and albedo measurements for several thermal control coatings on Pegasus satellite - thermophysics 12 p2237 N67-24646
Test tool to simulate critical portions of Pegasus meteoroid detector electronics
[NASA-CR-84431] 14 p2513 N67-27440
Thermally isolated temperature sensor for space application Pegasus satellite 17 p3060 N67-30585
Electrical power system for Pegasus satellite 17 p2995 N67-30590
Meteoroid penetration measurements by Explorer XVI and XXIII satellites and Pegasus satellites for application to spacecraft design 18 p3332 N67-32964
Pegasus satellite measurement of near earth meteoroid environment - Van Allen belt radiation, and earth albedo data
[NASA-TM-X-53629] 20 p3733 N67-34548

PELLET
Thin sectioning technique for cumulus cloud snow pellets 03 p0418 N67-12497
Clad-pellet contact conductance for reactor fuel elements
[EUR-3155.E] 07 p1129 N67-17356
Comparative cost of fabricating oxide fuel element by vibration compaction, and sintered pellet processes incorporating three modes of enrichment
[BNWL-273, VOL. 3] 07 p1132 N67-17497
Fabrication of gadolinium oxide-30 wt percent aluminum oxide compacts
[Y-1571] 14 p2579 N67-27583
Behavior of crystals and voids in centrally heated uranium dioxide green pellets
[WAPD-TRANS-47] 16 p2961 N67-28274
Calculation of plasma fraction emitted as hypersonic jet from laser irradiated pellet
[LGI-67-7] 19 p3607 N67-32284
Preparation of ceramic high density pellet compacts of uranium dioxide from powder form
[Y-DA-1733] 23 p4280 N67-39024

PELTIER EFFECT
SA SEEBECK EFFECT
SA THOMSON EFFECT
Thermoelectric cooling advantages and physical principles using Peltier effect on semiconductor devices
[FTD-TT-65-1762] 10 p1769 N67-20586

PENDULUM
SA GYROSCOPIC PENDULUM
Classical pendulum problem in weightlessness environment of artificial earth satellite
[FTD-TT-65-1563] 15 p2795 N67-28681
Behavior of gelatin tested at cryogenic temperature with torsion pendulum
[NASA-CR-89278] 23 p4188 N67-38809

PENDULUM APPARATUS
Pendulum apparatus and method for testing combustion properties of black gunpowder
[TDCK-66451] 07 p1181 N67-18071
Generalized spherical functions for solving problem of motion of axisymmetric solid with spherical cavity filled with viscous fluid around fixed point 13 p2419 N67-26183
Pendulum sclerometric determination of surface energy and hardness of rocks
[BM-RI-6962] 17 p3061 N67-30630
Modified ballistic pendulum standard for calibration of shock transducers
[SC-TM-66-567] 17 p3071 N67-31473
Device for computing correlation functions, sound field analyzer, method for finding envelopes of correlation functions, and pendulum device for measuring surface slope of underwater structures
[JPRS-40884] 20 p3638 N67-34227
Instrument for measuring surface slope of underwater hydraulic structures using hermetically enclosed gravitational pendulums 20 p3639 N67-34231
Pendulum steering attitude stabilization for thermal probes or coring drills in glaciers
[CRREL-SR-116] 24 p4436 N67-39434

PENETRATING PARTICLE
Onset patterns of polar cap atmosphere due to enhanced ionization caused by penetrating solar cosmic ray particles
[NASA-TM-X-55637] 05 p0757 N67-15155
Theory of ion and atom penetration in solids
[ARL-66-0149] 07 p1179 N67-17654
Detection system for monitoring plutonium penetration through tantalum capsules by counting alpha particles with silicon surface barrier detectors
[LA-3684] 17 p3134 N67-31038

PENETRATION
SA CRATERING
SA FRAGMENTATION
SA IMPACT
SA PROJECTILE PENETRATION
SA TARGET PENETRATION
Techniques for estimating thunderstorm penetrations of tropopause
[AFCRL-66-558] 04 p0572 N67-14318
Penetration of barriers by meteorites 05 p0771 N67-14872
Penetration of thin shield by meteorite 05 p0771 N67-14873
Penetrability of bird wings

[RAE-LIB-TRANS-1143] 06 p1238 N67-19068
Hardness term derivation to relate Rammsonde number to energy equation - penetration resistance
[CRREL-SR-100] 10 p1620 N67-29500
Penetration of drops determined for cross current injection of isooctane jets into high velocity airstreams
[NASA-TM-X-1363] 11 p1859 N67-22839
Satellite measurements of penetration rate for particles causing Zodiacal light 11 p1979 N67-23439
Dependence of induced coloration in glass on penetration depth of fast electrons
[BM-350] 12 p2168 N67-24198
Meteoroid penetration measurements by Explorer XVI and XXIII satellites and Pegasus satellites for application to spacecraft design 18 p3332 N67-32064
Meteoritic penetration and impact damage to earth satellites 18 p3335 N67-32186
Oxygen chemisorption and penetration at nickel surface by measuring surface potential changes
[REPT.-66-C-327] 20 p3596 N67-35212
Atomic penetration in solids and crystal lattice influence on penetration behavior
[AECL-2757] 23 p4297 N67-39074
Time-acceleration traces for cylindrical ogival nose projectiles penetrating soil medium
[SC-DC-66-2424] 23 p4356 N67-38359
PENETRATION BALLISTICS
Armor plate stress waves and penetration mechanics
[AROD-3842-7] 01 p0115 N67-10501
Transient behavior and response tests of synthetic fiber felts under ballistic impact and projectile penetration
[TR-67-8-CM] 06 p0900 N67-16453
Multivariable analysis of mechanics of penetration of high speed particles
[NASA-CR-664] 06 p0978 N67-16664
Computer code to study low velocity penetration phenomena
[AD-646457] 12 p2062 N67-24068
PENETROMETER
Penetrometer technique applied to lunar surveying staff concept
[NASA-TN-D-3937] 12 p2099 N67-23819
Design, instrumentation system, target, and test facility of penetrometer for determining projectile impact deceleration effects in soil-like materials
[SC-DR-66-2715] 17 p3066 N67-31035
Design, construction, and operation of portable, manually operated penetrometer and shear unit for testing soil strength 18 p3270 N67-31929
Soil response to dynamic loads measured by penetrometers
[NASA-CR-849] 20 p3627 N67-34028
PENNING DISCHARGE
Electron oscillation observed in radio frequency study of Penning plasma discharge 03 p0394 N67-12622
Penning discharge in a strongly inhomogeneous magnetic mirror field produced using collisionless plasma
[REPT.-67-11] 19 p3517 N67-33419
Brightness of Penning discharge ion source used in cosmotron injector
[BNL-11364] 21 p3825 N67-35835
Improvement of hydrogen pumping characteristics of Penning discharge getter-ion pumps used with accelerators employing hydrogen ion sources
[BNL-11365] 21 p3826 N67-35837
Beam-plasma interaction in cold-cathode Penning reflex discharge
[CEA-R-3681] 23 p4316 N67-38269
PENNING GAUGE
Investigation of Penning ionization gauge discharge and lithium ion emission for plasma synthesis for microwave applications
[ECOM-2740] 05 p0685 N67-15273
Penning ionization gauge apparatus to investigate Bernstein plasma waves by scattered microwave detection 07 p1163 N67-17012
Modified Penning gauge for generating collimated flowing plasma without confining magnetic fields
[GE/EE/67A-3] 17 p3140 N67-30186
PENTABORANE
SA PROPYL PENTABORANE
Toxicology of boron hydrides - alterations in tissue amines by toxic decaborane-14 and pentaborane-9 modified by hydrazines and propynylamines
[SAM-TR-66-112] 14 p2461 N67-27017
Simulated altitude performance of full scale, high temperature turbojet engine using pentaborane and HEF-2 fuel
[NASA-MEMO-12-31-58E] 18 p3319 N67-31544
Postcombustion behavior of boric oxide from pentaborane-air combustion during expansion through convergent-divergent nozzle
[NACA-RM-E57120] 18 p3354 N67-31730
PENTAERYTHRITOL TETRANITRATE /PETN/
Mechanical and detonation properties of rubber bonded sheet explosives containing PETN
[ISL-T-36/65] 20 p3667 N67-35269
PENTANE
Synthesis of thiacyclopentanes and thiacyclohexanes to provide reference compounds in needed for identification of sulfur compounds in crude oils
[BM-RI-6970] 16 p2853 N67-29975
Proportional counter filled with mixture of isopentane
[NASA-CR-87328] 19 p3509 N67-33741
PENTOLITE
Finite difference method for calculating transient isentropic flow resulting from pentolite explosion 07 p1064 N67-17029
PEPTIDE
Inelastic slow neutron scattering for investigation of biological systems including polypeptides, glutamic acid, and glycines
[PA-TR-3367] 02 p0212 N67-11837
Effect of acetic anhydride in anhydrous dioxane on C-terminal residues of peptides
[EATR-4038] 02 p0216 N67-12288
Ionizing radiation effects in solid amino acids, peptides, and proteins
[TID-23265] 10 p1562 N67-20779
Imine reaction as intermediate step in syntheses of alanine peptides 21 p3783 N67-35952
Precipitation-peptization method for preparation of mixed thoria-urania sols
[ORNL-TM-1782] 21 p3785 N67-36295
